OPENSCAPE BUSINESS

OPENSCAPE BUSINESS

OpenScape Business is the modern and future-proof all-in-one solution for Unified Communication & Collaboration, specially tailored to the requirements of small and medium-sized enterprises with one or more locations.

OpenScape Business offers small and medium-sized enterprises everything they need for their individual and diverse communication requirements, unified in a single flexible and scalable solution. The OpenScape Business architecture allows use independently of the existing telephony infrastructure – regardless of whether this is classic telephony, IP or DECT. From powerful telephony to a feature-rich set Unified Communication (UC) solution, OpenScape Business always provides enterprises with up to 500 subscribers, or 1000 subscribers in one network, with the right solution.

DRAG&DROP CONFERENCE

Save travel costs, exchange information fast and effectively: Use the conference capabilities in OpenScape Business for this! No manual setup of conferences on the telephone: Set up conferences very easily with a few clicks in your UC client. Select whether, as the conference manager, you would like to start a spontaneous or a planned telephone conference – with or without Web Collaboration.

FAVOURITES LIST

Save the phone numbers of your most important business partners and fellow workers in your personal favourite list! This allows you to establish contact quickly without wasting time searching for the phone number.

DIRECTORIES

Automatically search all linked phone books (directories in the system, Exchange; linked via LDAP or the OpenDirectory Service) with one query! This guarantees minimum effort when searching for a contact.

DIALING BY MOUSE CLICK

You find the phone number of a customer in an email or in the internet and would like to make contact. No problem: Highlight the phone number and then dial it automatically! You don't lose any time due to having to key in the phone number on the telephone.

CALL JOURNAL

Who has called and whom did I not reach? The Call Journal informs you of this at all times and lets you make contact with a click.

LIVE CALL RECORDING

Easily record a call or a conference. So you will not lose any details.

ACCESS PROTECTION

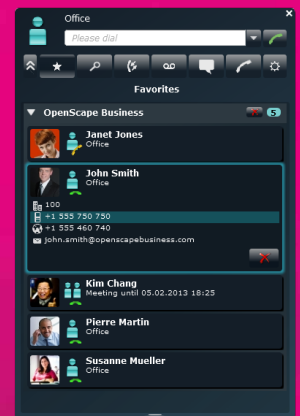

Priority is placed on security! A six character password secures access to the client and voice box. Of course, the default codes must be changed at the first access. This takes a little time, but increases security.

OPENSCAPE BUSINESS UC CLIENTS

Depending on the selected UC solution (UC Smart or UC Suite), different UC clients with different functions and integration options are available to you. Choose the OpenScape Business UC client optimum for your way of working to make your daily communication easier and to improve customer service.

MYPORTAL SMART

myPortal Smart gives easiest access to all UC smart functions, such as presence display with favourites, quick search for contacts, phone book, instant messaging, voicemail, and call journals. The user can be informed by email if voice messages were received. The UC client configures itself to your desktop and is installable on all usual operating systems (Windows and Mac).

MYPORTAL FOR MOBILE/TABLET

myPortal for Mobile/Tablet is the web-based user interface for mobile employees with smartphones and tablet PCs. It thus gives mobile employees access to UC functions such as presence or voice messages, regardless of where and when they are on the road. The mobile device is therefore fully integrated into the enterprise communications system.

Various user adjustable dialing methods (Callback, GSM or call-through) can reduce voice call costs on the mobile phone.

MYPORTAL FOR DESKTOP

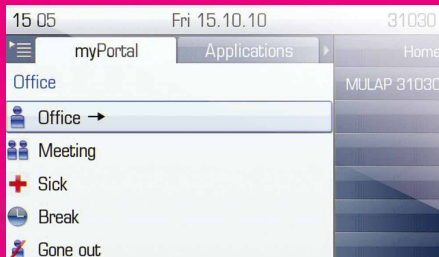

myPortal for Desktop give access to all UC Suite functions of OpenScape Business. In comparison with myPortal Smart, further functions are available such as Drag&Drop conferences, personal Fax Message Box, dialing by mouse click, and "CallMe!". Different versions of myPortal for Desktop are available.

MYPORTAL FOR OUTLOOK

myPortal for Outlook seamlessly integrates all UC Suite functions of myPortal for Desktop in Microsoft Office Outlook. Therefore, for instance, every user has direct access to their personal voice and fax messages, can dial directly from their Outlook contacts, or use these contacts for planning telephone conferences.

MYPORTAL FOR OPENSTAGE

With myPortal for OpenStage users can access the OpenStage 60/80 telephones for voicemail and presence functions.
