

# Programming a Redial Key

You may program a redial key to quickly dial frequently used numbers or access features.

## When using the menu:

- Press the "Program/service?" key.
- Arrow to and select "Prog. Feature key?" or press \*91
- Press the programmable key you would like to program.
- Select "Change key?"
- Select "Redial key?"
- Enter the number to be programmed.
- Arrow to and select "Save entry?"
- To program another key, press another programmable key.

## When using a programmed key:

- To place a call using a redial key, simply press the key.
