

# DELICIOUS DINING

BARS, RESTAURANTS & HOTELS

*Serving excellence in hospitality for over 25 years*

Nix Communications made their proposal to me back in July 2014 for migrating over 80 telephone, fax, alarm and broadband lines in 8 different venues for my group of hotels and restaurants offering me by far the best quote.

I've always been suspicious of taking the cheapest deal because in my experience the company will normally over promise and under deliver. However with NIX I'm pleased to say that I didn't encounter one single hitch!

The staff have always been both knowledgeable and friendly plus quick to help with any problems that I have experienced in a fast, competent and professional manner.

I have also made considerable savings across the board with my telephone call charges and also my telephone and broadband line rentals.

The thing that's most impressive about this privately owned company is that you can speak to the MD Nick Zammit no matter what time of day or night should you ever have any queries, questions or doubts, which is a rare service to find nowadays.

I wouldn't hesitate to recommend NIX to anyone who places any importance on their businesses phone, fax, broadband or other communication needs and I'm certainly glad that I made the decision to migrate my business over to NIX.

Jamie Hughes
