NIX NETWORK SERVICES

We commissioned Nix Network Services to install a new telephone system with VoIP capability after being initially approached by them to see if they could help us. Their approach was not at all pushy or persistent and their sales director Nick Zammit visited us and listened to what we had to say and took the time to explain all our potential options. We concluded a deal that worked for us and gave us exactly what we needed. They dealt with the finance and the installation, migrating lines and the installation took less than a day. There was an absolute minimum down time and their engineer was neat tidy polite and extremely knowledgeable.

In all nothing was too much trouble, they delivered exactly what they said they would and I have no hesitation in recommending them. The after sales service was equally impressive.
